Experience

EsterEggz Art Business – *Illustrator, Designer, and Business Owner* — Apr 2021 – Present

- Designed and sold original merchandise through an independent art business, generating 6,000+ sales across online platforms and 15+ conventions.
- Managed production, inventory, and fulfillment for 10,000+ physical products as demand grew.
- Created commissioned illustrations and promotional assets for brands including Huion, XP-Pen, Gaomon, Oasis Dental, and MIYA HIMI, revising to client feedback and brand guidelines.
- Grew my social media following to over 700,000 through consistent visual branding and audience engagement.

Confidential International Publisher – *Freelance Illustrator (NDA)* — Jul 2025 – Nov 2025

- Provided panel shading and rendering in Clip Studio Paint for a major international comics/manga publisher, matching its established art style to professional publication standards.

Design Projects

Sleep Vitamin Packaging – *Packaging Design* — Jan 2025 – May 2025

- Designed a wraparound bottle label in Illustrator with front panel, supplement facts, barcode, and recycling marks.
- Developed a cohesive color palette and typographic hierarchy so key product information reads clearly on the shelf.
- Rendered photorealistic 3D product mockups in Adobe Substance 3D Stager to visualize the final package.

Colorado Symphony Poster Mailer – *Print Design* — Jan 2025 – May 2025

- Designed a print-ready, double-sided poster mailer for the Colorado Symphony's 2025 season in Illustrator and InDesign.
- Organized a full season of concerts, repertoire, and artists into a grid layout with clear visual hierarchy.

Game Projects

Pidgeo and Beeta – *Senior Capstone, 2D Co-op Puzzle-Platformer* — Aug 2025 – May 2026

- Created character art and animations for an asymmetric co-op puzzle-platformer built in Godot by a four-person team.
- Designed tile-based levels and puzzle progression supporting a narrative of betrayal and revenge; collaborated with an external composer on original music.

Camp Cupid – *Dating Sim with Custom Controller* — Aug 2025 – Dec 2025

- Collaborated on a team to design and build a dating simulator in Godot, including original character and background art.
- Designed a Bluetooth bow-and-arrow controller running on Tiny Core Linux, implementing input handling with an infrared sensor bar and accelerometer for accurate physical interaction.
