## Education

University of Colorado, Boulder - Cumulative GPA: 3.888, Dean's List

Sept 2023 – May 2026

- **Bachelor of Science:** Creative Technology and Design
- **Minor:** Computer Science

## Technical Skills

**Languages:** C++, C, Java, JavaScript, Python, HTML, CSS, SQL

**Technologies:**

- **Web & Backend:** Node.js, Express.js, PostgreSQL, Handlebars, Git
- **Design & UI/UX:** Figma, Photoshop, Illustrator, Lightroom
- **Digital Art & 3D:** Procreate, Clip Studio Paint, Nomad Sculpt, Rhino, SketchUp
- **Data, Hardware, & Media:** Jupyter Notebook, RStudio, Arduino, Premiere Pro, After Effects

## Experience

**EsterEggz Art Business** - *Freelance Illustrator and Business Owner*

April 2021 – Present

- Built and scaled an independent art business generating 6,000+ sales through online platforms and 15+ conventions.
- Managed production, inventory, and fulfillment for 10,000+ products while meeting increasing demand.
- Grew social media presence to a peak of 730k followers through strategic content and audience engagement.
- Illustrated promotional content for clients including Huion, XP-Pen, Gaomon, Oasis Dental, and MIYA HIMI.

**Confidential International Publisher** - *Freelance Illustrator (NDA)*

July 2025 – Nov 2025

- Completed a paid illustration commission for a major international comics/manga publisher under NDA, producing panel shading and rendering to professional publication standards.
- Applied advanced digital shading techniques in Clip Studio Paint to match the publisher's established art style and technical pipeline.

## Projects

**Pidgeo and Beeta** - *Senior Capstone, Puzzle Platformer Game*

Fall 2025 – Spring 2026

- Co-developed a 2D cooperative puzzle-platformer in Godot, featuring asymmetric co-op gameplay where a pigeon and beetle use complementary abilities to solve environmental puzzles.
- Designed tile-based level layouts and interconnected puzzle progression supporting a narrative-driven story of betrayal and revenge.
- Contributed character art and animation as part of a 4-person team, collaborating with an outside composer for original music.

**Datura** - *Software Development Project*

Spring 2025

- Built a secure full-stack application using Node.js, Express.js, PostgreSQL, and Handlebars.js, with bcryptjs authentication and Mocha/Chai backend testing.
- Designed database schema and RESTful routes for core application features, implemented across 6+ features including study session tracking, avatar customization, and leaderboards.
- Collaborated in a 5-member Agile team across 3 development sprints to design and deliver a full-stack study tracking app, including responsive UI and original art assets.

**Camp Cupid** - *Game Design Project*

Fall 2025

- Collaborated on a team to design and build a dating simulator in Godot, including original character and background art.
- Designed a Bluetooth bow-and-arrow controller running on Tiny Core Linux, implementing input handling with an infrared sensor bar and accelerometer for accurate physical interaction.

**Environment for the Americas Redesign** - *Accessible UI/UX Project*

Fall 2025

- Conducted a comprehensive accessibility audit and redesign aligned with WCAG 2.2 AA compliance standards.
- Rebuilt site components using HTML and CSS to improve semantic structure, color contrast, keyboard navigation, screen reader support, alt text, labels, and readability.
